

CONSULTANCY LED PROJECT RESOURCING

Implementation of new systems or delivering compliance improvement programs often involves additional temporary resources, and typically wastes valuable client time with resource management.

Clarity's **Consultancy Led project resourcing**

takes the resourcing load off the client AND can help improve project efficiencies and CSV, DI and IT compliance methodologies.

Strategy and resources for a complete solution.

Our input provides timeline, effort, cost and client time savings whilst simultaneously improving compliance and upskilling your team in the process.

Typical Client additional activity and problems encountered:

Client Resourcing

- Owns the problems
- Identifying recruiter
- CV Search and Interviewing
- Timesheet management

“We engaged Clarity to deliver a highly critical piece of work, which had tight timelines and a fixed completion date. Clarity quickly had a team onsite to commence the assignment, they reviewed our current methodologies, identified and implemented multiple improvements opportunities in approach, strategy and knowledge transfer to our CSV team and business process owners.

Clarity completed the assignment 2 weeks ahead of schedule and under budget. From start to finish Clarity took the problem off my shoulders, enabling me to progress other important activities”.
